

EUGENE PAOLO S. DIZON

Logistics Data Analyst | Supply Chain Reporting | Excel VBA Automation

Pampanga, Philippines | epsdizon@gmail.com | linkedin.com/in/epsdizon/ | epsdizon.github.io

PROFESSIONAL SUMMARY

Logistics Data Analyst with 4+ years at TE Connectivity consolidating shipment data from 9 global freight forwarders into daily Air and Ocean track and trace dashboards. Builds Excel VBA automation that cleans, validates, and reports forwarder data, with data quality scorecards that flag missing references, milestones, and container numbers. Owns reporting workflows end to end, from raw forwarder files to dashboards, monthly trends, and upload-ready files. Also trained in bookkeeping with Xero and QuickBooks Online.

SKILLS

Logistics & Supply Chain: Freight Forwarder (FFW) Track & Trace, Air & Ocean Shipment Visibility, Milestone Tracking, Container & MAWB/MBL Validation, Inventory Aging Reports, Trade Compliance

Data & Automation: Advanced Excel (VBA Macros, PivotTables, SUMIFS, VLOOKUP), Data Cleaning, Data Quality Checks, Dashboard Reporting, Tableau

Business Tools: Microsoft 365, Google Workspace, Notion, Asana, Trello, ClickUp

Bookkeeping: Xero, QuickBooks Online (QBO), Bank & Credit Card Reconciliation, Profit & Loss Statement, Balance Sheet

PROFESSIONAL EXPERIENCE

TE Connectivity — *Global Planning Analyst* | Mar 2022 – Sep 2026

Consolidated daily shipment data from 9 freight forwarders (including Kuehne+Nagel, DSV, DHL Global Forwarding, Expeditors, and Kerry Logistics) into standardized Air and Ocean track and trace dashboards.

Designed and built an 8-module Excel VBA tool that runs the full daily workflow from one control workbook: consolidation, Air and Ocean dashboards, Sea-Air and delimited upload files, and data quality reports.

Mapped each forwarder's file layout to one standard format, including DSV's new layout and DB Schenker's merge into DSV, keeping reporting continuous through vendor changes.

Automated data cleaning that fixes text dates, error values, and number formats, removes duplicate and stale bookings, and clears invalid container numbers, logging every change for audit.

Built a daily data quality scorecard, overall and per forwarder, that counts missing TE references, invalid MAWB/MBL numbers, missing or out-of-order milestones, and missing container numbers.

Created a fiscal-year monthly trend report of forwarder data quality errors and automated the fiscal calendar (October–September, Tuesday-start weeks) used by both dashboards.

Prepared recurring reports including the monthly Arrival Shipment Report and dashboard, shipment and parcel ETA reports, BU integration files, and inventory aging reports.

Self-Employed / Freelance — *Social Media Manager* | Sep 2020 – Oct 2025

Managed Facebook pages for local businesses (milk tea shop, pharmacy, dental office), creating content and running Meta ads.

Handled customer inquiries and complaints, and tracked ad metrics to adjust strategy.

EDUCATION

Bachelor of Science, Service Engineering and Management | Mapúa University | 2021
